

Meemoo : digitalisering van nitraatfilms

Photo bundle

Non-binding English translation of the Dutch original

Disclaimer

Transparency and knowledge sharing are core values for meemoo. That is why we share our main tender dossiers in the fields of digitisation and archiving. This way, everyone can see how we work or find inspiration. However, we would like to draw attention to this warning and disclaimer.

This document has been drawn up in the context of a defined project with a specific objective, timing and budget, each of which is based on a range of circumstances, meemoo's vision on digitisation etc. During or after implementation of the project, the vision, circumstances or other contextual elements may change or have changed. This document may also contain errors. Anyone who copies this document in full or in part remains solely responsible for estimating the consequences for his interests. Most importantly-but not exclusively-it is best to seek legal advice before copying the legal provisions.

Meemoo cannot be held liable in any way for any disadvantage that any party may encounter through the provision or copying in full or in part of these documents.

1. Introduction

This photo book is intended to illustrate some of the various deterioration phenomena that can occur with nitrate films. These deterioration phenomena can occur to a greater or lesser degree in the collection offered for digitisation.

Before delivering a batch, a technical report will be given for each film, in which the deterioration phenomena of that film are clearly mentioned, as well as an estimate of the time needed to make the films ready for scanning.

2. Examples

2.1. Damaged perforations

2.2. Scratches

2.3. Warp

2.4. Broken splices
